Knowledge management to reduce poverty and improve the human condition in Ethiopia

VIRTUAL STUDENT FEDERAL SERVICE

VSFS

Project Title	Knowledge management to reduce poverty and improve the human condition in Ethiopia
Project Summary	Employ innovative ways to strategically capture and share technical knowledge, leverage good practices, map activities, and improve development effectiveness to support USAID's portfolio in Ethiopia - one of the largest and most complex in Africa.
Country	Ethiopia

Project Description

Support poverty reduction and improved quality of life for Ethiopians while gaining experience in many aspects of international development, from policy development and program planning, to implementation and evaluation. Activities may be tailored to interns' skills. Examples include:

-Manage knowledge sharing platforms and events: work with diverse partners to scope and implement appropriate and effective knowledge capture and sharing activities including website, newsletter, monthly seminars/webinars, and peer learning sessions.

-Identify and curate technical content: get the right knowledge to the right people at the right time (in the right way).

-Apply GIS analysis and data visualization to create compelling summaries: generate maps of current activities, infographics, and partner network maps.

-Conduct research to ensure a solid evidence-base for the next five-year development strategy. Focus areas may include digital finance, governance, resilience, urbanization, and youth.

Required Skills or Interests

Skill(s)
Analytical writing
Cultural diplomacy
Data analysis
Data visualization
GIS expertise
Infographic design

Storytelling/blogging/vlogging
